Ludwing Valdés Reyes

Software Engineer · Backend & Enterprise Systems

github.com/lilpne25-ui

Mexico

Desktop and web software for industrial and commercial operations: SQL-backed applications, integrations with the ERPs and CAD tools a company already runs, and backend services in TypeScript and .NET.

EXPERIENCE

VLUX · Co-founder · Technology & product development

- Architecture and development across four product lines: CRM, point of sale, industrial costing and quality management.
- Integrations with ERPs, CAD/PDM, legacy databases, messaging webhooks and devices.
- Release discipline: repositories, documentation, validation scripts and explicit feature status.

Industrial manufacturing company · IT & Systems

- Technical support across hardware, software and networks.
- Backups and information recovery; monitoring of network and servers.
- Installation, configuration and preventive maintenance of equipment and systems, including the network addressing plan.
- Technology support for the quality management system and its documentation.

SELECTED WORK

Quality management system for an ISO 9001 operation

`Product base · Windows build`

A desktop application that turns quality work (controlled documents, records, evidence, findings and corrective actions) into a traceable process instead of a folder tree.

`Electron · React · TypeScript · SQL Server`

CRM with structured lead intake from WhatsApp

`CRM implemented · AI layer planned`

A commercial CRM that follows a lead from first message to quote and after-sales, with a webhook intake that captures prospects reliably and keeps a person in charge of what gets sent.

`TypeScript · Webhooks · REST APIs · Relational DB`

Costing and engineering bridge for a manufacturing plant

`Production build verified`

A Windows application that connects CAD data, an existing costing database and the plant's ERP, so bills of materials stop being retyped between systems.

`Python · PySide6 · pyodbc · C# / .NET 8`

- **Point of sale on Odoo Community** (Pilot candidate). Odoo · PWA · Python
- **Technical catalog backend** (Foundations). Next.js · PostgreSQL · Prisma
- **Attendance and operational reporting** (Internal tools). .NET · WinForms · SQL Server

SKILLS

Backend & APIs	TypeScript, Node.js, C# / .NET, Python, REST APIs, Webhooks, Authentication & RBAC
Data & Databases	SQL Server, PostgreSQL, Prisma, Pervasive / Actian (ODBC), Data validation & migration
Frontend & Desktop	React, Next.js, Electron, WinForms, PySide6, Progressive Web Apps
Infrastructure & Practices	Networks & IP planning, Backups & recovery, Windows workstations & servers, Git & GitHub, Hexagonal architecture, Release smoke tests, Odoo Community
